## BIPLANE CONSTRUCTION WORK NEARS COMPLETION

It is expected that Gus Schaefer's biplane, which is nearing completion, will be taken to Leilehua and given a try-out by its builder in about three weeks. The fier is assuming proportions in the factory over the Royal Hawaiian Garage, and all that is needed for completion is a number of turn-buckles which are on their way here from the East. Schaefer has not done any real flying, but he has made a careful study of the science of aviation and is confident that his trial trip will be a success. Captain Winter and other officers stationed at Leilehua have made application for the honor of making the first flight in the biplane.
